

After 1st flight - see telemetry 1,10 mAh

Measurement	Unit	Minimum	Average	Maximum	S
Time	[hh:mm:ss:SSS]	0	---	27:13.115	
Hoehe	[m]	-24.0	---	171.0	
Vario	[m/s]	-10.4	---	14.5	
Motorspann.	[V]	2.1	---	21.0	
Motorstrom	[A]	0.0	58.9	74.3	
Kapazitaet	[Ah]	0.0	0.6	1.1	
Longitude	[°]	8.765916	8.770066	8.774933	
Latitude	[°]	46.067150	46.069496	46.071883	

After 2nd flight - see telemetry 1,78 mAh

Measurement	Unit	Minimum	Average	Maximum	S
Time	[hh:mm:ss:SSS]	0	---	18:22.065	
Hoehe	[m]	-33.0	---	158.0	
Vario	[m/s]	-17.9	---	13.7	
Motorspann.	[V]	17.1	---	19.7	
Motorstrom	[A]	0.0	54.8	71.6	
Kapazitaet	[Ah]	1.08	1.50	1.78	
Longitude	[°]	8.765866	8.770131	8.775683	
Latitude	[°]	46.067566	46.069579	46.071466	

After 3rd flight - see telemetry 2,01 mAh

Measurement	Unit	Minimum	Average	Maximum	Stand
Time	[hh:mm:ss:SSS]	0	---	04:01.973	
Hoehe	[m]	0.0	---	58.0	
Vario	[m/s]	-3.3	---	8.4	
Motorspann.	[V]	1.9	---	19.1	
Motorstrom	[A]	0.0	50.6	69.9	
Kapazitaet	[Ah]	1.78	1.99	2.01	
Longitude	[°]	8.767450	8.770304	8.773716	
Latitude	[°]	46.068666	46.070117	46.071500	
CPS-Hoehe	[m]	1290.0	1300.0	1340.0	

 Please consider I use one momentary switch for reset [and](#) screen shots, so every time I take a picture also reset is activated !! (or momentary switch is NOT indicated?? too short time comand ???)

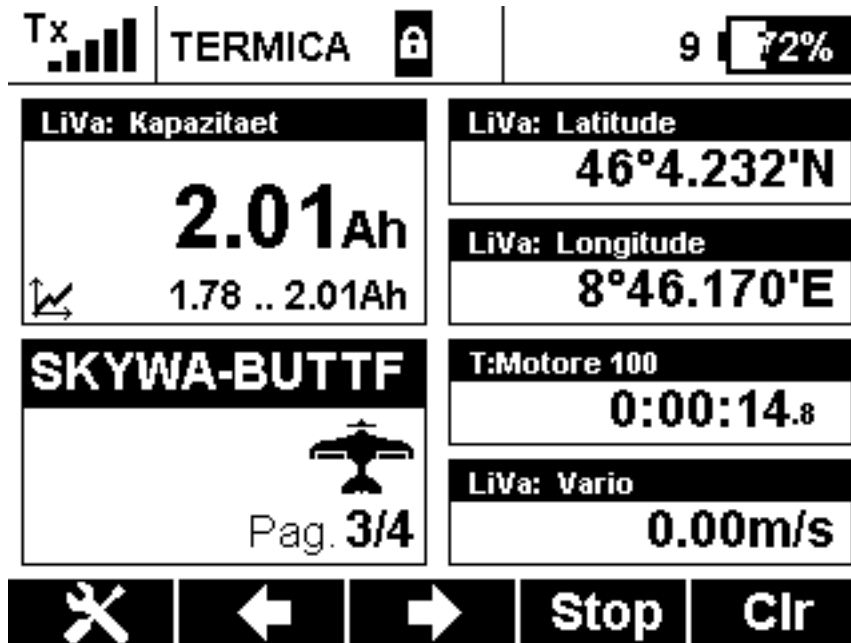

After 3rd flight :

OneBattery declares 5340 mAh ??

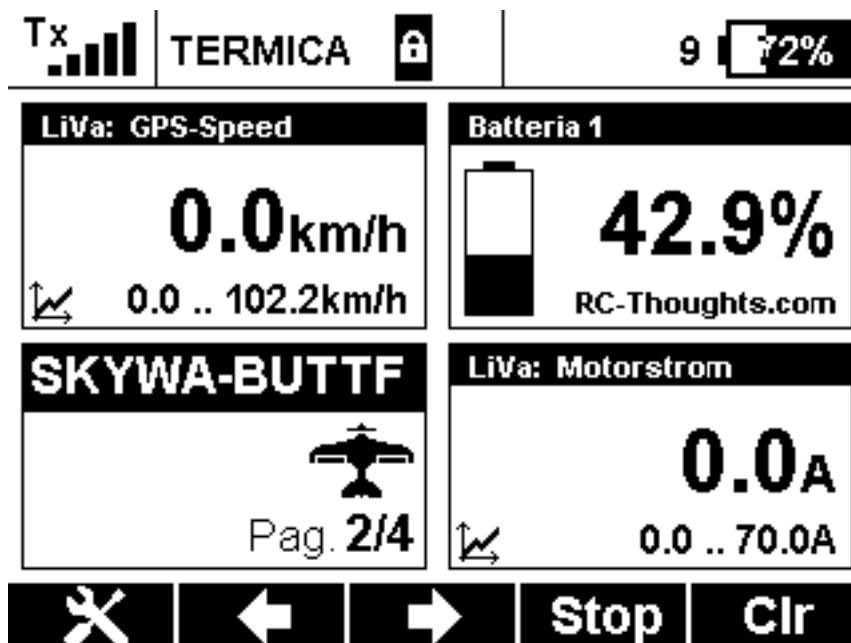

The screenshot shows a flight telemetry interface with the following elements:

- Top Bar:** Tx signal strength (4 bars), DISTANZA (black square), and battery level (93%).
- Left Column:**
 - LiVa: Hoehe:** 0m, with a range of 0..0m and a graph icon.
 - Model Name:** SKYWA-BUTTF, with an airplane icon and 'Pag. 1/4'.
- Right Column:**
 - RCT-OneCapacity:** 5340mAh.
 - T:Timer volo:** 00:00.0.
 - LiVa: Entfernung:** 15m.
- Bottom Bar:** Control icons including a wrench, a left arrow, a right arrow, a 'Start' button, and a graph icon.

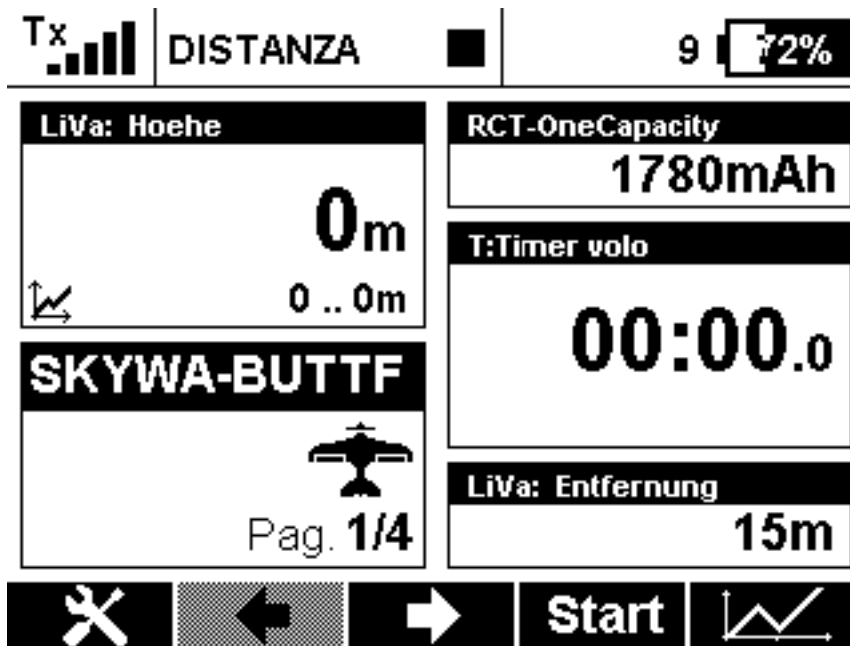

-telemetry from Liva Kapazitat 2,01 mAh (measure by LinkVasrioPro mid Gps-Wstech)

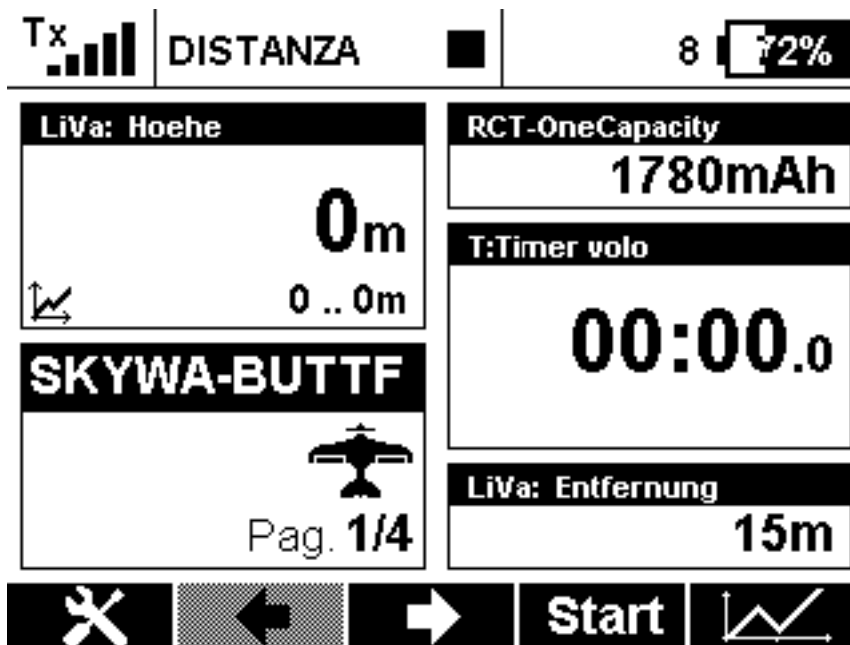

- %Battery telling 42,90% battery capacity (Lipo in use 3500mAh)

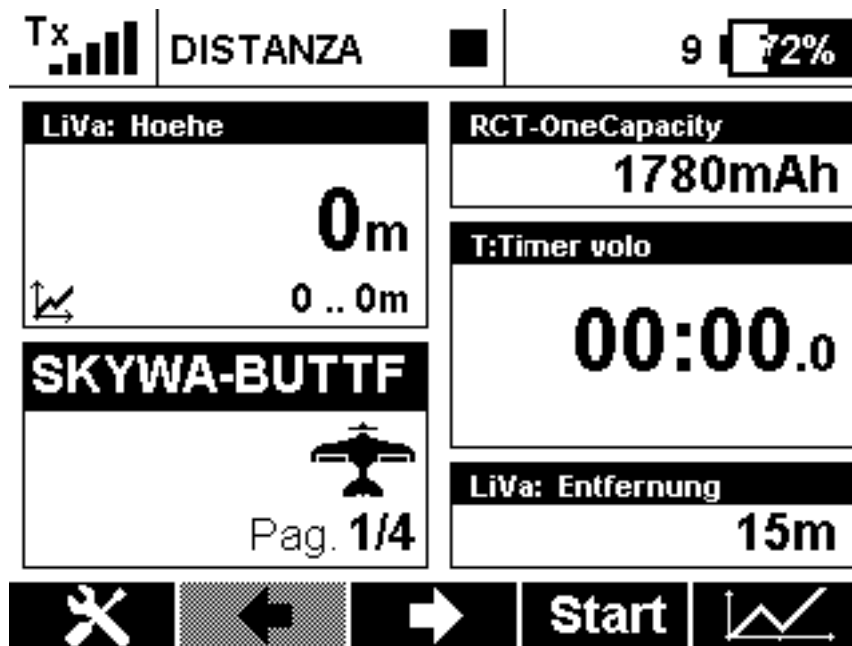

At this moment, with 5340mAh on OneBattery on the screen I pressed again the reset switch:(be careful too take the 3 screenshots you've seen before I pressed reset 3 times!)
- see 3 screen shots with indication 1780mAh !

-

-

-
-
-
-
-

reset and NOW zero !

There is something that at a certain moment sum-up value in OneBattery. There is a reset problem, from 5340 to 1780 (value of 2nd flight - and from one flight to the other Tx switch off)

-
